SUMMARY

Gameplay Programmer focused on building scalable systems in Unreal Engine 5 utilizing C++ and Blueprints. Experienced in implementing core gameplay mechanics, custom AI behaviors, and networked multiplayer logic. Practical experience spanning from 2D pixel art integration and UI development to 3D level blockouts and real-time sequencer cinematics.

TECHNICAL SKILLS

Game Engines:	Unreal Engine 5, Unity 6
Programming:	C++, C#, Blueprints
Gameplay:	Gameplay Systems, AI, Multiplayer
Design:	Level Design, Environment Design, UI
Cinematics:	Sequencer, Lighting, Camera Animation
Tools:	Git, GitHub, Blender, Photoshop

FEATURED PROJECTS

Project Killer UNREAL ENGINE 5 C++ BLUEPRINTS - Programmed core player mechanics and networked multiplayer state synchronization. - Set up AI behavior trees and constructed structural level blockouts.	Gameplay & Multiplayer Developer
Three Friends UNREAL ENGINE 5 - Integrated 16-bit sprite animations and monster walk cycle logic. - Programmed custom gameplay elements like falling tree traps.	Gameplay Systems Developer
Last Delivery UNITY 6 C# - Programmed 2D mobile platformer movement and physics controllers. - Built checkpoint systems, UI flow, and level progression logic.	Unity Game Developer
Cinematic Sequences UNREAL ENGINE 5 SEQUENCER - Animated racing cinematics using dolly-in pushes and specific camera tilts. - Edited flow utilizing match cut transitions within custom environments.	Cinematic Artist

EDUCATION

Advanced Diploma in Game Design & Development (Ongoing)	Monolith Research and Training Labs
Bachelor of Computer Applications (CGPA: 8.51)	SRM Institute of Science and Technology
