SUMMARY

Gameplay Programmer focused on building scalable systems in Unreal Engine 5 using C++ and Blueprint Visual Scripting. Experienced in core gameplay mechanics, custom AI behaviors with Behavior Trees, and networked multiplayer logic. Practical experience spanning 2D sprite integration, UI development, 3D level design, and real-time Sequencer cinematics.

TECHNICAL SKILLS

- Game Engines: Unreal Engine 5 Unity 6
- Programming: C++ C# Blueprint Visual Scripting
- Gameplay: Gameplay Systems AI Systems Enemy Behaviors Multiplayer Fundamentals
- Design: Level Design Environment Design UI Development Lighting
- Cinematics: Unreal Sequencer Camera Animation
- Tools: Git GitHub Blender (Basic) Adobe Photoshop

FEATURED PROJECTS

PROJECT KILLER

Gameplay & Multiplayer Developer

Unreal Engine 5 C++ Blueprints

- Programmed core player mechanics and networked multiplayer state synchronization using C++ and Unreal Engine 5 replication system.
- Implemented enemy AI Behavior Trees with patrol, detection, and combat states; built structural level blockouts and encounter scripting.

THREE FRIENDS

Gameplay Systems Developer

Unreal Engine 5 Blueprint Visual Scripting

- Integrated 16-bit sprite animations and monster walk cycle logic into a story-driven 2D adventure built entirely in Blueprints.
- Programmed custom gameplay elements including falling tree traps, enemy AI states, UI systems, and audio event triggers.

LAST DELIVERY

Unity Game Developer

Unity 6 C# ▶ Play on itch.io

- Programmed 2D mobile platformer movement and physics controllers in C#; built checkpoint systems, UI flow, and multi-stage level progression.
- Owned the full development pipeline from gameplay scripting through QA and published the final build publicly on itch.io.

CINEMATIC SEQUENCES

Cinematic Artist

Unreal Engine 5 Sequencer

- Animated racing cinematics using dolly-in pushes and precise camera tilts; edited flow with match-cut transitions in custom environments.
- Applied post-process lighting and color grading to achieve a polished, production-quality cinematic output.

EDUCATION

Advanced Diploma in Game Design & Development

Ongoing

Monolith Research and Training Labs

Bachelor of Computer Applications

Graduated

SRM Institute of Science and Technology CGPA: 8.51
